Ranking Country Resilience - RESI

Seeking ways to Monitor Resilience and looking for best practices this paper considered 108 countries basically divided in 3 Regions: America(AMER, 21 Countries), Europe(AVECO, 22 Countries) and Other countries from the Rest of the World(OTHER, 65 Countries) for which some key Synthetic Indicators like the Social Progress Index(SPI), the Environmental Performance Index (EPI), and the Sustainable Development Goals Index(SDGI) were selected, besides some related to Governance and the World Risk Index(WRI), to find out countries that are doing better today allowing developing a representative Resilience Ranking Index(RESI)

Radar Graph Comparing Means of 3 Regions

Top 10 Countries are mostly Nordic Countries something also shown by the World Economic Forum Recent Global Competitiveness Report (WEF-SSN), as well as the Bloomberg Covid Resilience (BLOOM-CR). Moreover, at least in the case of the RESI, there is a majority with Women as Prime Ministers (the ones in Black)
